

# infoTouch MeatOS

The premiere Slaughter to Sale Operating System for independent processors and butcher shops.

Far more than a POS, we've built a system that integrates every step of the slaughter to sale process. Our system provides real-time information successful butchers use to grow their businesses at their fingertips. MeatOS was designed and built in slaughter facilities and butcher shops across the country, which gives us insights few could match. Check out these capabilities built for slaughterhouses and butcher shops (see chart for various MeatOS features):

	MeatOS Base Production	MeatOS Processing	MeatOS Reg Butcher
